Dear Parents and Guardians,

We are reaching out to inform you about a deeply concerning and dangerous trend that has recently surfaced on social media platforms such as TikTok.

This trend, referred to as "smoking" or the "Chromebook Challenge," involves students intentionally inserting foreign materials into school-issued Chromebook charging ports to cause the device to emit smoke, which often results in the device catching fire. This behavior poses a significant safety risk to our students and staff and can also result in costly damage to school property.

Please be advised that if a student is found to have deliberately damaged a Chromebook in this way, a financial obligation will result in the cost of the damaged device. Currently, the cost your family would be burdened with is \$411 per device plus the cost of any additional property damage that may occur.

Furthermore, any student engaging in this dangerous trend will face disciplinary action in accordance with the school's code of conduct and if appropriate, reported to local authorities for further action which may include arson and/or criminal mischief charges.

We urge you to speak with your child about the serious dangers and consequences associated with this type of behavior. Please emphasize the importance of using their Chromebooks responsibly and the potential harm that can result from such reckless actions.

We appreciate your help as we work to address the issue proactively by educating our students.
