Dear Parents, and Families

I would like to start off by congratulating all the students and family members for making it through the first few weeks of distance learning. This has been a huge adjustment and transition and so many of our students are doing an amazing job with logging into their Google classrooms everyday, joining their teachers' zoom sessions, accessing all the learning materials, and completing the assignments posted. We understand that all families have different circumstances at home, so please be sure to communicate your questions or concerns with teachers, community coaches, or team leaders as they arise so that we can do our best to get the students back on track quickly. We value student achievement and support systems, so our staff have made outreach commitments and have made themselves available to support students in various different ways, whether it's with academic work, social/emotional challenges, or even just a simple well-being check in. Please take advantage of these supports.

Since we have reached the mid marking period point of the fourth quarter we would like to send a friendly reminder about the importance of continuing to keep up with school work through the remainder of the school year. Although we have made grading adjustments to quarter four it is still extremely important for all students to work through the curriculum so that they are in a stable position for next school year. We recognize that not all students excel in a remote learning setting, however we are asking that all students put fourth their best effort, just as we are asking our teachers to. This is a devastating situation that we are in regardless, but every little thing we try will make it better and will set the students up for better success in the fall. For more information on grading please review our updated Continuity of Education Plan on our website.

With that said, we would like to continue to provide additional extended learning opportunities for our students. We are excited to announce that this summer we will be offering a FREE Virtual Summer BOOST program to all K-8th grade students. The Virtual BOOST program will engage students in a Google classroom, similar to what they are experiencing now, but with a fun game-based experience to go along with it. The program will include an immersive educational tool where the opportunities for creativity and imagination are limitless. Students will have the opportunity to learn critical thinking skills through popular online games. To enroll and for more information please go to our school website.

As always, the safety and well being of our staff and families are our first priority. Please continue to adhere to the governor's orders of social distancing and we are looking forward to seeing all our students and families soon. Be safe!

Regards,
Tiffany O'Brien, CAO
